Gill & Searle's ed List of Bulbs

FOR PRESENT PLANTING, and

Flower Seeds for Winter Bloom

For complete list of Flower, Vegetable and Farm Seeds, etc., refer to our illustrated Catalogue. COPIES POST FREE.

Ranunculus Bulbs Gill & Searle's Exhibition Strain (Mixed Colors)

(Plant February to May).

Under the above name we recommend very highly our "EXHIBITION" STRAIN of RANUNCULUS. The flowers are double, of immense size, and combine every possible shade of color. This strain produces flowers of perfect form, borne on stout but graceful stems, at least twice as large as the best previously known types. PLANT ROOTS WITH CLAWS DOWNWARDS.

Bulbs, 1/6 doz.; 10/- per 100. Post Free.

Anemone, St. Brigid.

ANEMONES

GILL & SEARLE'S
SPECIAL STRAIN

ST. BRIGID TYPE.

(Plant February to May).

Owing to their brilliancy of color, Anemones are unequalled amongst the Spring Flowering Bulbs for bedding and general garden decoration. The colors range from brightest scarlet to flesh pink, and from lilac to deep purple, some of the flowers being mottled, striped, and ringed by various shades. For cut blooms, as well as for garden decoration St. Brigid Anemones can be recommended.

Bulbs, 1/6 doz; 10/- 100.

ANEMONE.

St. Brigid, Bright Scarlet.

A most conspicuous dazzling scarlet color, about 95% true.

Bulbs, 1/6 doz.; 10/- 100.

FREESIAS

GILL & SEARLE'S NEW COLORED HYBRIDS.

(Plant during February, March and April).

This is a fine strain, with open campanulate flowers of many colors, including lavender, saffron, and blue. They are sweet-scented and invaluable for cutting. A great improvement on previously known types.

Bulbs, 2/6 doz.; 8/- 50; 15/- 100.

REFRACTA ALBA.—White, delightfully fragrant . . . 1/- doz.; 3/6 50; 6/- 100

HYACINTHS.

(Plant January to April).

Named Varieties in Separate Colors, 1/6 each; 15/- doz.

Postage Extra.

LILIUMS.

ACCLIMATISED BULBS. (Postage Extra).

Rich and varied in colour, stately and handsome in habit, profuse in variety, and with fragrantly scented flowers, the Lilies are worth growing in every garden. The Liliums are especially well adapted for growing with other plants. The bulbs are obtainable from APRIL TO JULY, EXCEPT CANDIDUM AND LONGIFLORUM, WHICH ARE OBTAINABLE FROM JANUARY TO APRIL, and flower from November to February, according to variety.

AURATUM (Golden-Rayed Lily of Japan).—One of the finest of the Liliums.

Flowers are sweet-scented, large in size, and of ivory white, with a distinct golden band down each petal, and prettily spotted.

CANDIDUM (Christmas Lily or Madonna Lily of the Italians).—Most beautiful, large sweetly perfumed, pure white blooms 1/- each; 10/- doz.

CROCEUM.—Orange spotted black 1/6 each

DAVURICUM.—Upright orange flowers 1/9 each

HANSONI.—Bearing numerous massive flowers of a rich golden yellow, heavily spotted black; one of the finest Lilies. Rare 3/6 each

HENRYI.—Large orange flowers . . . 1/-, 1/6 and 2/6 each, according to size

LONGIFLORUM (Bermuda Easter Lily).—Pure white, sweetly scented, tubular flowers 1/- each; 10/- doz.

LONGIFLORUM GIGANTEUM.—White trumpet-shaped flowers of great substance 1/3 each; 12/- doz.

PARDA-BOLDTI.—Considered to be a cross between Pardalinum and Humboldtii. The umbelliferous stems grow 4 feet high, and bear many orange-red flowers 1/6 each

PARDALINUM (Panther Lily).—Yellow and orange-red, spotted; fine florist's flower 9d. each; 8/- doz.

PYRENAICUM.—Yellow spotted black 1/9 each

REGALE (The "Regale Lily").—The centre of the flower is flushed with yellow, shading to white at the outer edges. Externally the flowers are streaked brown, shading to pink at the tips. Very distinct 1/6 to 2/- each

SPECIOSUM ALBUM (White Tiger Lily).—Pure white . . 2/- each; 22/- doz.

SPECIOSUM MAGNIFICUM.—A rich shade of deep pink and white 1/6 each; 15/- doz.

SPECIOSUM MELPOMENE (Crimson Tiger Lily).—Pink and white spotted 1/6 each; 15/- doz.

SPECIOSUM RUBRUM (Pink Tiger Lily).—Pink and white spotted 1/6 each; 15/- doz.

THUNBERGIANUM NAMED VARIETIES.—A splendid large-flowering species for semi-shaded positions. Plant the bulbs about 18 inches deep.

PUNCTATUM.—Orange-yellow with reddish-brown band 1/6 each

SANGUINEUM.—Dark red 1/6 each

TIGRINUM FORTUNEI GIGANTEUM.—A grand robust variety of Fortunei, producing branching heads up to 20 large rich orange-scarlet flowers spotted crimson-brown; height 6 feet 1/- each; 10/- doz.

TIGRINUM FLORO-PLENO.—Flowers double, orange-scarlet 1/- ea.; 10/- doz.

TIGRINUM SPLENDENS.—Orange-scarlet, black spots . . 1/- each; 10/- doz.

MONTBRETIAS (Plant April to July).

One of the finest sections of hardy bulbous plants, unequalled for cut flowers or decoration; flowers freely produced on stems of about 18 inches high, resembling a miniature Gladioli.

QUEEN ADELAIDE.—Orange-scarlet 9d. each

STAR OF THE EAST.—Orange-yellow 9d. each

TRAGEDIE.—The flowers are maroon red with a tinge of yellow 9d. each

VESUVIUS.—Vivid scarlet blooms 9d. each

MIXED SORTS.—A splendid mixture 4d. each; 3/- doz.

New "Earlham" Giant-flowered Awarded the R.H.S. Gold Medal.

HIS MAJESTY.—Red, golden yellow, tall large flowers 1/- each

LADY HAMILTON.—Yellow flowers, reddish orange centre 1/- each

POCAHONTAS.—Rich coppery scarlet with golden lustre, centre orange with small blood-crimson blotches 1/- each

Tulips

(Plant from Feb. to May).
Postage Extra.

The Darwin are perhaps the noblest Spring-flowering garden subject. They succeed best in an open position and throw up flowers of great substance on long stems. All the best colors are in our mixture. Plant bulbs about 4 inches deep in the ground.

General List.

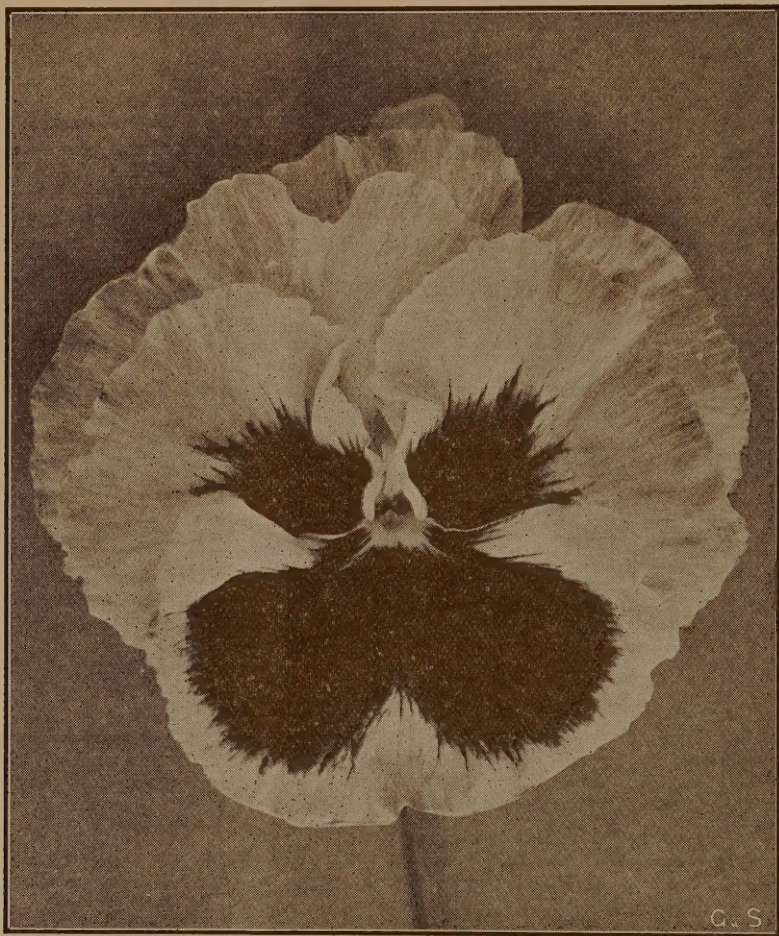

ALBA.—Long spikes of pure white flowers 1/- doz.
ROSEA.—Rosy pink blooms 1/- doz.

SPECIAL LIST OF GILL & SEARLE'S FLOWER SEEDS for Winter Bloom

Pansy, our great Speciality

We make Pansies one of our specialties, and spare no expense or trouble in procuring, direct from the growers, the finest strains obtainable.

The best method for raising the seed during JANUARY, FEBRUARY and MARCH is to sow in boxes, placing these in calico or hessian-covered frames for protection from the hot sun, removing the coverings at night and on cool days, so as not to draw the young seedlings.

Pansy, Roggli's Giants, Gill & Searle's Exhibition Strain.

AWARDED MANY PRIZES LAST YEAR.

An exhibition strain of Pansies of exceptional merit. The plants distinguish themselves by their robust growth, and form large circular bushes with strikingly large healthy-looking foliage. The enormous flowers are freely produced on long, strong stems. It is not only the size of the flowers that makes these Pansies so attractive, but the glorious shades of colour and their exceptional brilliancy, many of them possessing a velvety sheen which greatly enhances their beauty.

The accompanying illustration, which is of a flower measuring $3\frac{1}{2}$ inches across and produced from a plant grown in sandy soil and without any special attention, and produced from a plant grown in sandy soil and without special attention.

Seed, 2/6 Packet; Larger Packet, 5/-.

PANSY—(Continued).

INCOMPARABLE (Gill & Searle's Special Mixture.—We have every confidence in saying that no mixture of Pansy seed throughout the world is more consistent in producing so high a percentage of first-class blooms 2/6 and 5/- pkt.
BATH'S EMPRESS, EXTRA SPECIAL STRAIN, MIXED.—Most striking and richest in colour of all Pansies 2/6 and 5/- pkt.
ENGLISH & SCOTCH, MIXED.—A very choice strain 1/6 pkt.
MASTERPIECE.—A fine strain of five spotted varieties 1/- pkt.

CINERARIA.

GILL & SEARLE'S "GRANDIFLORA," MIXED.—A magnificent strain producing large, well-formed flowers, and embracing a very wide range of shades and color combinations . . . 2/6 pkt.
PRIZE STRAIN.—A very choice bedding mixture, including many shades 1/6 pkt.

PRIMULA MALACOIDES.

LAVENDER. — The flowers are pale lavender, and borne in numbers on long stems, which render it most useful for cutting 6d. pkt.
"PRINCESS MARY."—This new variety we offer is of special merit. The flowers, which are of good size, are of rose-pink shade 9d. pkt.

Cineraria, Gill & Searle's Grandiflora.

Iceland Poppy, G. & S. Special Strain

Sow the seed of Iceland Poppies in boxes in canvas frame from the **BEGINNING OF JANUARY** to the **MIDDLE OF MARCH**, hardening off the seedlings and planting out as early as possible in the Autumn so as to have the plants well established before the cold weather sets in.

ICELAND POPPY

"Grendon" Art Shades

(Re-Selected).

This new Australian-raised strain of Iceland Poppy represents a great advance on all previous introductions in new colors of this flower. With the exception of a possible odd plant, "Grendon" Hybrids do not include the older colours, the range of shades covering — cream, sulphur, tango, mandarin, flame, bright scarlet, soft pink, coral pink, rosy pink, etc., a very charming and useful collection of art shades. Quite apart from its many fine colors, "Grendon" Hybrids marks a very high pitch of efficiency in Iceland Poppies, its special features being the long stout stems, the large-sized blooms, which are beautifully frilled, and its free-flowering habit. The strain has been carefully fixed, and will come out about 95 per cent. true. In offering this new "Grendon" Hybrids Iceland Poppy, we do

Iceland Poppy, "Grendon" Art Shades, Re-Selected.

so with every confidence, and can thoroughly recommend it as the best introduction sent out in this popular useful Winter and Spring flower

4/- $\frac{1}{8}$ oz.; 7/6 $\frac{1}{4}$ oz.; 1/- pkt.

ICELAND POPPY, SUNBEAM HYBRIDS.—A re-selected strain, representing a great improvement on the ordinary Iceland Poppies. The flowers are of much greater size, and are borne on longer stems, thus rendering this new strain particularly valuable for decorative purposes. The "Sunbeam" Hybrids include a wide range of shades, and can be confidently recommended

4/- $\frac{1}{4}$ oz.; 9d. pkt.

COONARA PINKS (RE-SELECTED STRAIN).—A specially re-selected strain of pink and salmon shades 1/- pkt.

ICELAND POPPY, WHITE.—Pure white flowers 6d. pkt.

ICELAND POPPY, YELLOW.—A fine shade of lemon yellow 6d. pkt.

ICELAND POPPY, TANGERINE.—Deep tangerine orange 6d. pkt.

Set of 3 Separate Colours, 1/3.

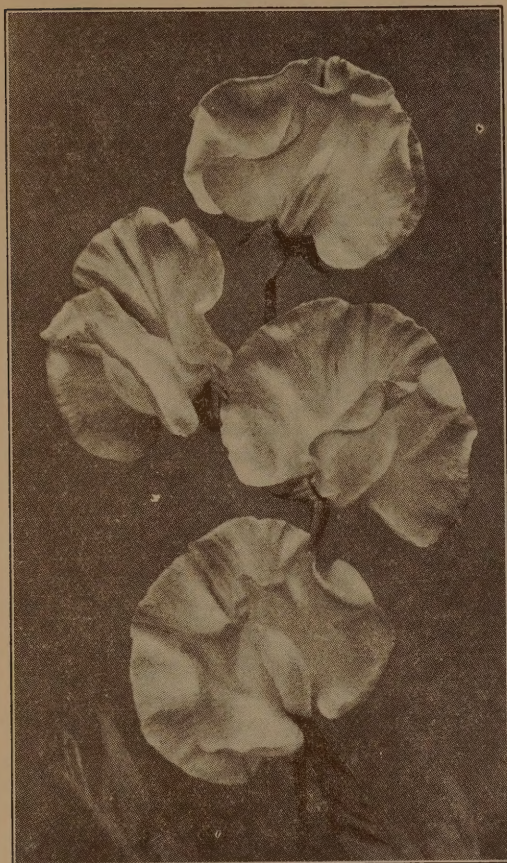

ICELAND POPPY, MIXED.—Including white, orange and yellow 2/6 $\frac{1}{4}$ oz.; 6d. pkt.

MIGNONETTE.

MACHET, IMPROVED, NEW YORK MARKET STRAIN.—One of the finest and most sweetly scented Mignonettes introduced; highly recommended 6d. pkt.

FOR GILL & SEARLE'S SELECTED SEEDLINGS SEE PAGE 18.

Winter Flowering Spencer Sweet Peas

Pink Cherokee.

COLLECTION OF WINTER-FLOWERING SWEET PEAS.

Gill & Searle's GRENDON NURSERY

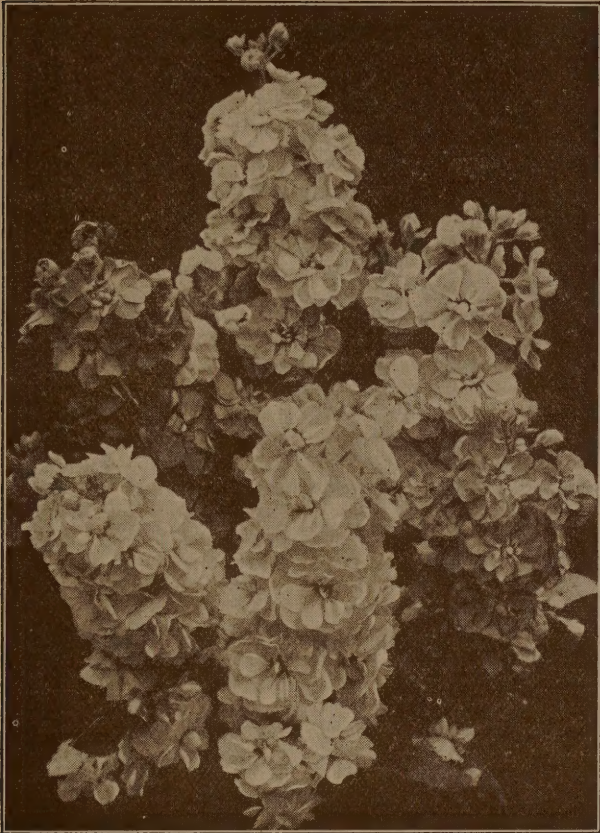

Lovers of flowers are cordially invited to visit and inspect our Nursery, particularly during March, April and May, when the Dahlias are flowering. Many other plants of interest can be seen throughout the year. Visitors are always welcome, there being no obligation to purchase.

Our "GRENDON" NURSERY is situated at the corner of HAMPTON STREET and CENTRE ROAD, NORTH BRIGHTON. The Hampton Street 'bus from North Brighton Railway Station passes the gate.

THE NURSERY IS OPEN FROM 8 a.m. TILL 5 p.m. DAILY, SUNDAYS
AND HOLIDAYS EXCEPTED.

Telephone Numbers: Nursery, X4310. Shop, F3645, F3646

Stock, Early Large Flowering of Nice

Stock, Early Flowering of Nice.

Gill & Searle's Selected Seedlings

The following Seedlings if planted during February and early in March, should flower during the Winter and early Spring months.

Our Seedlings are grown from Selected Strains of Seeds, and can be thoroughly relied on to produce the very best results. The prices quoted are consistent with the quality we supply. As the same attention and expense has to be bestowed in growing inferior quality as in growing our Selected Strains, it is undoubtedly poor economy to grow anything but the best, the difference in price being so slight and the ultimate results so much more satisfactory.

Not less than 1 dozen supplied of those priced at 6d. Not less than 50 plants supplied at the 100 rate. Postage or Freight extra on Seedlings. All Seedlings are sent per Rail at purchaser's risk.

FOR COMPLETE LIST OF SEEDLINGS REFER TO OUR
ILLUSTRATED CATALOGUE.

Haws Watering Cans

(English Make)

The exclusive salient features of the Cans are:—

CORRECT BALANCE.—Body and handles in true proportion. This secures comfort in use. The carrying-handle follows the natural hang of the arm. With the old-style can the cross-over handle makes for fatigue.

PERFECT ROSE ACTION.—Controlled by the tipping handle, the spout provides suitable pressure to function the Roses, which are designed to produce the true effect of natural rain. There is economy in the distribution of water, which goes just where desired, and the plants all receive an equal supply.

PATENT STRAINER.—This clears the Can and also serves to regulate the Roses. The Canister shape ensures freedom from splash, and the filling is equally satisfactory.

SPECIAL FINISH.—The Cans are substantially made and specially finished. All are tested before sending out. They may therefore be confidently relied upon for extreme hard wear. We are constantly receiving testimony to this effect.
